

## The Jakoparts Numbering System

## The online catalogue – all parts in one place!

## The best for Asian vehicles!

Quality parts from Herth+Buss Jakoparts can be recognised simply on account of their article number! The protected numbering system guarantees quality and fast part assignment. As the examples show, the 8-digit classified numbering system follows a clear structure, starting with the letter "J" for Jakoparts. This is followed by classification according to main product groups, then the 2-digit product sub-group number. The next number shows is an indication of the vehicle manufacturer. The last two digits are simply used for counting. Such a well thought-out numbering system allows employees familiar with the system to get information from the number, thus ensuring the fault-free expansion of the range.

### Example for Japanese application: Wheel bearing kit J4703002

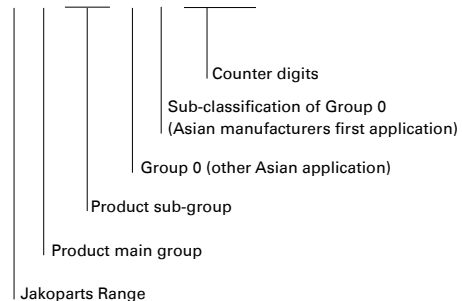

J 4 7 0 3 0 0 2 0

- 1 = Nissan | Infiniti
- 2 = Toyota | Lexus
- 3 = Mazda
- 4 = Honda
- 5 = Mitsubishi
- 6 = Daihatsu
- 7 = Subaru
- 8 = Suzuki
- 9 = Isuzu
- 0 = Other vehicle manufacturers

### Example for Asian application: Wheel bearing kit J4710504

J 4 7 1 0 5 0 4 0 0

- 1 = Asia
- 2 = -
- 3 = Kia
- 4 = Ssangyong
- 5 = Hyundai
- 6 = -
- 7 = Proton
- 8 = Other
- 9 = Daewoo | Chevrolet
